Facilitator:Oscar Evertsson

Participants:Oscar Evertsson,Mats Högberg, Filip Hallqvist, Jesper Jaxing

## Objectives

- Decide when to refactor the folder structure
- Delegate new tasks for everyone

## Reports

- Oscar has done the TagHandler class for a one-way dependency between Tags and Mails
- Mats has created an EventBus
- Filip has done a GUI-sketch and begun to implement it in code
- Everyone has started writing on the SDD, and also been looking into how unit testing works

## Discussion items

- How do we fix the folder and package structure?
- How do we use the EventBus?
- How can we connect the back-end with the GUI?
- How will we do our unit testing?

## Outcomes and assignments

- Refactor the package structure and general work this coming monday
- Oscar and Mats takes a look on the TagHandler to see if it works as it should
- Oscar and Mats tests a few classes

## Wrap up

- Thanks to Valborg we end this week a little early and will move on with the production next week.
