

Meeting Agenda

Date: 2015-04-21

Facilitator: Oscar Evertsson

Participants: Oscar Evertsson, Jesper Jaxing, Filip Hallqvist, Mats Högberg.

Objectives

- Ask our mentor about Joachim's thoughts regarding removing MailServer from the domain Model.
- Is inbox/outbox necessary?
- Decide next use case to implement.

Reports from previous meeting

- We've extended the functional requirements and dug deeper into the functional requirements.
- All alternative flows have been rewritten. (Jesper Jaxing, Oscar Evertsson)
- Review and updated the sequence-diagram. (Mats Högberg)
- Review the domain model. (Everybody)
- Figured out who's going to do what and started coding.
- A simple GUI have been created. (Filip Hallqvist)
- Implemented the send email use case.

Discussion items

- Decide next use case to work with.
- MVC folder structure.
- Inbox/outbox necessary?
- Who's taking contact with our mentor?
- Check whether our sequence diagrams matches our implementation.

Outcomes and assignments

- Next use case will be read email since it's one of the main functional requirements for our program.
- No MVC folder structure have been picked due to insufficient knowledge of javaFX. Filip Hallqvist have taken responsibility to dig deeper into this matter.
- Inbox/Outbox is not necessary since we can resolve this issue using only tags.
- Oscar Evertsson is taking responsibility to contact our mentor about this issue.
- Mats Högberg will analyse the diagrams and the implementation until next meeting.
- Start working on the UML/sequence diagram for read email. (Everybody)
- Everybody should read up on receiving email. (JavaMail API)

Wrap up

Unresolved issues

MVC folder structure
